

**Supplementary Table 1. Univariate analysis of risk factors associated with transient thyroid dysfunction**

Risk factor	Exp(B) (95% CI)	P-value
Chromosomal anomaly or syndrome	1.87 (0.55–6.33)	0.316
Gestational age	0.83 (0.59–1.18)	0.308
Birth weight	0.61 (0.25–1.50)	0.283
Thyroid disrupting medication	3.27 (0.87–12.33)	0.081
Iodine exposure (ICM, surgery)	4.44 (0.49–40.34)	0.186
Ventilator care	1.04 (0.22–5.01)	0.959

CI, confidence interval; ICM, iodine contrast media.
